

## **Senior React.js Engineer (KIEV REGION, UKRAINE, FULL-TIME)**

Preply is a fast-growing product company at an early stage of development, backed by Europe's most prominent investors. 100 people are currently working on building a global human-to-human online tutoring marketplace with locations in Kyiv and Berlin.

We are currently searching for a Senior React.js Engineer, passionate about vision and idea of our product and able to work with user-facing part of our application. We take inspiration from Spotify for building our engineering culture and implementing best practices. We work in small product teams, so this person will join our SaaS Team that is responsible for helping our tutors to be efficient and successful with Preply platform, and as a result, create an exceptional teaching experience for our tutors.

### **Your Competency Profile:**

At least 3+ years experience developing websites or applications.

Expert knowledge of JavaScript, React Ecosystem.

Familiarity with server-side MVC web frameworks, such as Ruby on Rails or Django.

Commanding grasp of HTML, CSS, webpack, gulp and related web technologies.

Exceptional communication skills. High level of self-organization, ownership, responsibility.

Any of Backbone, React-Native, GraphQL, Python, AWS experience is an additional strength.

Min. B2 English level

### **What we offer:**

- ✓ Work in the same office with easy-going and open-minded people from all over the world
- ✓ Easy-to-reach location in the city centre
- ✓ Active office life with biweekly gatherings
- ✓ Monthly bonus deposit for self-development on Preply.com
- ✓ Strong financial package, paid vacation and sick leave
- ✓ Possibility to become a part of a truly big story at the start of its development
